Compli 310

The compact sewage lifting station for small residential units

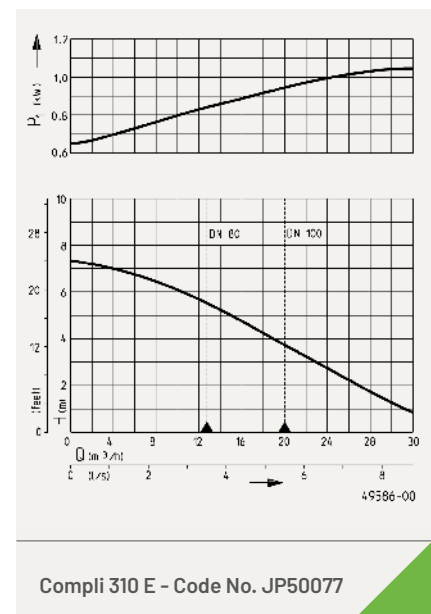

Whether it's an apartment building, a commercial company or a house-boat: Compli sewage lifting stations from Pentair Jung Pumpen always work perfectly everywhere - and have therefore been the first choice for decades when it comes to the safe disposal of sewage containing faeces.

With the new **Compli 310 E**, we offer you a sewage lifting station which, thanks to its compact dimensions, has been specially designed for small residential units such as basement apartments. It is easy to handle and maintain. Numerous connection options allow easy and flexible installation.

The powerful single-phase motor of the stainless steel pump rests on a stable ring housing made of grey cast iron, which gives the system a special stability and ensures quiet running.

Features:

- > Compact dimensions
- > Low weight - only 31 kg
- > Additional inlets vertical/horizontal
- > Anywhere connectable thanks to single-phase motor
- > With powerful vortex impeller pump
- > Complete unit incl. control and swing-type check valve

53 X 53 CM

**Compact dimensions
for one-man installation**
