

Hebefix Pro
DRAINAGE LIFTING STATION

ALL-IN-ONE

ONLY ONE DEVICE FOR MANY APPLICATIONS

The **Hebefix Pro** therefore scores highly when faeces-free waste water needs to be disposed of and there is no waste water pipe nearby.

This versatile **'all-in-one'** device can be used in commercially available pre-wall installations or connected directly to all grey water dispensers such as hand basins, showers, bathtubs or washing machines.

Aggressive media with a salt content of up to 15% as well as waste water from water softener and condensate from gas condensing boilers or pellet heating systems can also be pumped without any problems thanks to the powerful pump (U3 KS Spezial version).

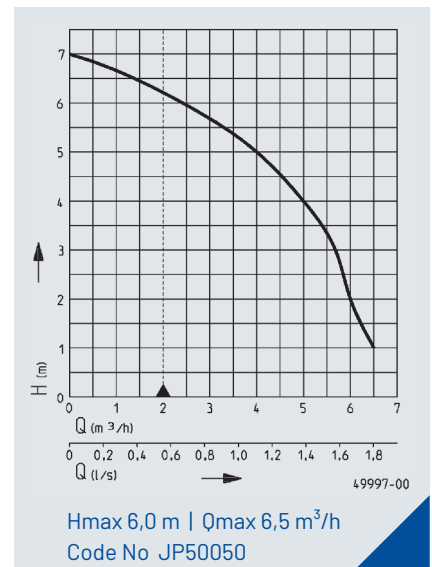

An alarm unit for high water alarms ensures safety.

AREAS OF APPLICATION:

- › Wash basin, shower, bathtub, washing machine
- › Refrigerated counters, air conditioning systems
- › Water softeners
- › Gas condensing boilers, pellet heating systems
- › Dishwashers in kitchenettes

TECHNICAL FEATURES:

- › Powerful pump (U3KS Spezial-version)
- › Integrated alarm unit for high-water alarms
- › Variable inlet and connection options
- › Small dimensioned pressure pipes enable low installation costs
- › High-quality and easy-to-clean plastic tank (ABS)

- › The compact system is suitable for many installation situations:
 - Pre-wall or direct connection
 - Five inlet connections
 - Discharge optionally on the left or right
